Background/Supporting Information

The Police Department requests approval to amend the existing contract with ChoicePoint. ChoicePoint's Auto Track is a collection of databases that the MPD accesses under the current contract to identify and locate suspects in crimes, to identify and locate known associates of these suspects, and to locate associated addresses, phone numbers and vehicles used by suspects or their known associates. There is no financial impact as this expenditure was considered in the 2003 Police Department general fund budget.
